## **Introducing the PrimeRx™ Pharmacy Technology Management System**

Our Windows-based PrimeRx™ pharmacy management system serves as a local or hosted platform for our innovative solution offerings. We offer products, services, Apps, APIs, and vendor interfaces to keep your pharmacy running at the peak of performance.

PrimeRx™ provides essential functions, including patient and provider intake, prescription processing, workflow management, claims processing, labeling, dispensing, inventory management, report generation, automated refill, and patient record management solutions.

The PrimeRx™ platform was developed in direct response to pharmacist needs. Pharmacists expressed a need for a user-friendly, technology-based solution that would add efficiency to their workflows, automate key processes, and better serve patients and we delivered. PrimeRx™ offers technology-based solutions for nearly every pharmacy service.
